Design System — StudySprint Planner

Step A: Styling Approach

Styling approach: Custom CSS

StudySprint Planner uses custom CSS to create a clean, modern, and student-friendly interface. The styling is defined in client/src/styles.css and uses a light background, blue accents, white content cards, rounded corners, and subtle shadows.

The design focuses on readability, consistency, and ease of navigation. Blue is the main color for branding and primary actions, while red, amber, and green distinguish task priorities and important task states.

Step B: Colour Tokens

Token	Value	Usage
Primary	#2563EB	Branding, primary buttons, and important actions
Primary Hover	#1D4ED8	Hover state for primary buttons
Background	#F5F8FC	Main page background
Background Accent	#EAF3FF	Soft blue gradient background
Surface	#FFFFFF	Cards, forms, navigation, and modals
Text	#172033	General text and task titles
Heading	#0F172A	Main page headings
Secondary Text	#64748B	Descriptions, navigation labels, and supporting text

Muted Text	#8A98AB	Less prominent text and completed task titles
Border	#DFE8F3	Card borders and section separators
Highlight	#DBEAFE	Active navigation links, selected filters, and highlighted controls
High Priority	#DC2626	High-priority task badge
Medium Priority	#B45309	Medium-priority task badge
Low Priority	#15803D	Low-priority task badge
Success	#15803D	Completed task status text
Success Background	#DCFCE7	Completed task status background
Error	#DC2626	Delete actions and error-related text
Error Background	#FEF2F2	Error messages and destructive-action hover states

Step C: Type Scale

Font family: Inter with system font fallbacks

The application uses the following font stack:

Inter, ui-sans-serif, system-ui, -apple-system, BlinkMacSystemFont, "Segoe UI", sans-serif

Element	Value	Usage
H1	clamp(2rem, 5vw, 3.3rem)	Main page headings

H2	1.4rem	Section headings
H3	1.05rem	Subheadings
Brand	1.25rem, weight 800	StudySprint Planner branding
Body	Generally 1rem	Main content
Lead Text	1.02rem	Introductory descriptions
Task Title	1.08rem	Individual task titles
Small Text	Varies by element	Task subjects, dates, labels, and metadata
Eyebrow	0.72rem, weight 800	Small introductory labels

The typography uses different font sizes and weights to establish a clear hierarchy between page headings, task information, descriptions, and supporting details. The main heading uses responsive sizing to adjust to different screen widths.

Step D: Spacing Rule

StudySprint Planner uses CSS padding, margins, and grid gaps to maintain consistent spacing. Values vary according to the needs of each component.

Element	**Value**

Main Content Width	min(1100px, calc(100% - 40px))
Main Page Padding	55px 0 80px
Navigation Minimum Height	72px
Navigation Horizontal Padding	7%
Statistics Grid Gap	16px
About Grid Gap	18px
Task List Gap	13px
Statistics Card Padding	24px
Task Card Padding	21px 23px
Task Form Padding	28px
Button Padding	11px 17px
Input Padding	11px 12px

Border radius:

- Buttons and input fields: 9px
- Standard cards and filters: 15px for cards and 10px for the filter container
- Hero section: 24px
- Delete confirmation modal: 20px

Subtle shadows and light borders help separate content sections without making the interface visually crowded.

Step E: Reusable Components

Component	Styling and Purpose
Navigation Bar	Sticky, translucent white background with a bottom border and blue active-link styling
Primary Button	Blue background, white text, rounded corners, and darker blue hover state
Secondary Button	Light gray background with dark gray text
Hero Section	White-to-light-blue gradient, light border, rounded corners, and subtle shadow
Statistics Card	White background, light border, rounded corners, shadow, and prominent numerical values
Task Card	White surface with task details, priority, due date, completion status, and action controls
Priority Badge	Color-coded badge for high, medium, and low priority

Status Badge	Blue styling for regular task status and green styling for completed tasks
Filter Controls	White container with rounded corners and a light blue background for the active filter
Form Inputs	White background, gray border, rounded corners, and blue focus styling
Empty State	Centered content with generous padding
Error State	Red text, pale red background, and light red border
Delete Confirmation Modal	Centered white dialog with a translucent dark backdrop, rounded corners, and a red delete icon
Login Card	Centered white card with a maximum width of 420px, light border, and subtle shadow

These components use repeated CSS styling patterns to maintain a consistent appearance throughout the Dashboard, Tasks, About, and login interfaces.

Step F: Responsive Plan

Breakpoint: 700px

StudySprint Planner uses a CSS media query at max-width: 700px to adapt the interface to smaller screens.

Element	Desktop: Above 700px	Mobile: 700px and Below
Navigation	Horizontal layout	Vertically stacked layout with centered, full-width links
Main Content	Centered container with a maximum width of 1100px	Narrower horizontal margins and reduced top padding
Dashboard Statistics	Three-column grid	Single-column grid
Hero Section	Wider layout with standard padding	Reduced padding and vertically stacked content
About Section	Two-column grid	Single-column layout
Task Header	Horizontal arrangement	Vertically stacked elements
Task Form	Two-column form rows	Single-column form rows
Task Toolbar	Horizontal layout	Vertically stacked controls
Filter Buttons	Standard filter layout	Equal-width buttons
Task Footer	Horizontal arrangement	Vertically stacked information and actions

Task Actions	Standard button arrangement	Full-width buttons that share the available space
Deadline Items	Horizontal arrangement where appropriate	Vertically stacked details
Delete Modal	Standard dialog padding	Reduced padding to fit smaller screens

The responsive layout keeps the application's main features accessible on mobile devices while preserving the same colors, typography, component styling, and overall visual identity.
